

CiFOOD invites you to a day workshop on SUSTAINABLE FOOD PACKAGING

"Sustainable food packaging is an optimized, measured (quantified) and validated solution, which takes into consideration the balance of social, economic, ecological and safe implementations of the circular value chain, based on the entire history (life cycle) of the food product-package unit. Frontiers in sustainable food systems, 2023"

REGISTER HERE:
[https://cifood.au.dk/
cifood-workshop](https://cifood.au.dk/cifood-workshop)
Deadline 06. November

The one-day event, hosted by AU FOOD, will feature:

- Keynote presentations on food packaging-oriented research interests and capabilities across the AU departments
- Networking lunch
- Engaging with the AU food packaging research community
- Brainstorming session on the next steps in promoting cross-departmental collaboration on food packaging and funding opportunities

Everyone who has a passion for food packaging is welcome to join the event: PhD students, Post Doctoral fellows, Researchers

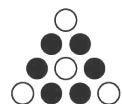

An updated program is posted here:
